CONTENTS

A general method for determining upstream effects in stratified flow of finite depth over long two-dimensional obstacles. PETER G. BAINES *page* 1

The nature of upstream blocking in uniformly stratified flow over long obstacles. PETER G. BAINES and FIONA GUEST 23

The breakdown of steady convection. T. B. LENNIE, D. P. MCKENZIE, D. R. MOORE and N. O. WEISS 47

Magnetohydrodynamic Flow and Turbulence: a report on the Fifth Beer-Sheva Seminar. H. BRANOVER, H. K. MOFFATT, M. MOND, E. S. PIERSON, P. S. SULEM and A. YAKHOT 87

Melting the roof of a chamber containing a hot, turbulently convecting fluid. HERBERT E. HUPPERT and R. STEPHEN J. SPARKS 107

Breakup of fluid droplets in electric and magnetic fields. J. D. SHERWOOD 133

Turbulence suppression in combustion-driven magnetohydrodynamic channels. J. C. REIS and C. H. KRUGER 147

A jet in crossflow. D. J. NEEDHAM, N. RILEY and J. H. B. SMITH 159

On the entrainment rate across a density interface. R. I. NOKES 185

Variational determination of the coefficient of sound dispersion in binary gas mixtures. P. RIESCO-CHUECA and J. FERNÁNDEZ DE LA MORA 205

Subharmonic resonance, pairing and shredding in the mixing layer. PETER A. MONKEWITZ 223

Separation and reattachment near the leading edge of a thin oscillating airfoil. TUNCER CEBECI, A. A. KHATTAB and S. M. SCHIMKE 253

The flow of a liquid film along a periodic wall. C. Pozrikidis 275

The interaction of two spatially resonant patterns. Part 1. Exact 1:2 resonance. M. R. E. PROCTOR and C. A. JONES 301

Developing fluid flow in a curved duct of square cross-section and its fully developed dual solutions. W. Y. SOH 337

Experimental investigation of double-diffusive groundwater fingers. PAUL T. IMHOFF and THEODORE GREEN 363

Numerical shock propagation in non-uniform media. D. W. SCHWENDEMAN 383

The centring dynamics of a thin liquid shell in capillary oscillations. CHUN P. LEE and TAYLOR G. WANG 411

Simulation of free boundaries in flow systems by lattice-gas models. P. CLAVIN, P. LALLEMAND, Y. POMEAU and G. SEARBY 437

Scattering of long waves by cylindrical obstacles and gratings using matched asymptotic expansions. P. A. Martin and Robert A. Dalrymple 465

Surface waves of large amplitude beneath an elastic sheet. Part 2. Galerkin solution. Lawrence K. Forbes 491

Oscillatory flow and mass transport in a curved tube. David M. Eckmann and James B. Grotberg 509

Longitudinal vortices imbedded in turbulent boundary layers. Part 2. Vortex pair with 'common flow' upwards. R. D. Mehta and P. Bradshaw 529

Thermal convection during the directional solidification of a pure liquid with variable viscosity. Marc K. Smith 547

A model for the onset of penetrative convection. P. C. Matthews 571

On wavy instabilities of the Taylor-vortex flow between corotating cylinders. Masato Nagata 585

Corrigendum 599
